Jotun Hardtop Design Metallics collection combines extraordinary sparkling metallic finishes with superior durability, withstanding direct sunlight for years on end. The collection consists of 10 carefully selected, sparkling metallic coatings for indoor and outdoor use.

Tested according to ISO 16474-2 (Weather-Ometer and ASTM G-154 QUV-A), proving very good colour and gloss retention. Meets requirements for ISO 12944, corrosion class C5-High for selected systems.

Deviations can occur between the samples shown, the delivered products and the standard references due to differences in production methods and pigments.
